Rahul Solanke

Computer Science Student | Aspiring Software Engineer

+91 7796805626 solanker519@gmail.com linkedin.com/in/rahul-solanke-b1a670284

Summary

B.Tech Computer Science Engineering student with strong foundations in Data Structures & Algorithms, OOP, DBMS, and software engineering. Experienced in building full-stack applications using Java, Spring Boot, React.js, Node.js, and SQL/NoSQL databases. Hands-on experience with REST API development, JWT authentication, database optimization, concurrency control, and Docker-based deployment. Published researcher with experience developing AI-powered and data-driven software solutions.

Technical Skills

Languages: Java,C, C++, JavaScript, SQL
Web & Backend: React.js, Spring Boot, Node.js, Express.js, REST APIs
Databases: PostgreSQL, MySQL, MongoDB
Tools & DevOps: Git, GitHub, Maven, Docker, Docker Compose, Postman, GitHub Actions
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Education

Vishwakarma Institute of Technology, Pune **Aug 2023 – Present**
B.Tech in Computer Science Engineering *CGPA: 8.88 / 10*

Project Experience

HireHub – Recruitment Management System & ATS **Java Backend / Full-Stack Developer**
Java 21 | Spring Boot | PostgreSQL | React | Docker

- Built a full-stack ATS supporting job management, candidate applications, and recruitment workflows with role-based access control.
- Developed secure REST APIs using Spring Security and JWT, with PostgreSQL-backed persistence and JPA-based data access optimization.
- Implemented dynamic job search using JPA Specifications, optimistic locking for concurrent updates, and SSE-based real-time notifications.

MealBridge – Surplus Food Donation Platform **Full-Stack Developer**
React.js | Node.js | Express.js | MongoDB

- Built a full-stack platform connecting hotels and NGOs to coordinate surplus food donations through REST-based backend services.
- Implemented donor–receiver matching and location-based filtering using geocoding and Haversine-distance calculations.
- Designed MongoDB data models and integrated frontend workflows with backend APIs for donation creation, discovery, and coordination.

Research Publications

- **Real-Time Multimodal Anaemia Detection Using Deep Learning** – Developed a non-invasive screening system using fingernail images and physiological signals with MobileNetV2/CNN. *IDCIoT 2026* [DOI]
- **SmartShield: IoT-Based Safety System with Emergency Alerts** – Developed an ESP32-based wearable safety system with GPS, GSM alerts, and fingerprint authentication. *ICFT 2025* [DOI]

Achievements & Certifications

- 2nd Runner-Up at *Nirman 3.0 Hackathon* for developing *Innovestia*, a startup–investor matchmaking platform. [Certificate]
- Participated in the Mastercard Code for Change Hackathon and developed a full-stack social impact solution under mentorship from Mastercard professionals. [Certificate]
- Google Data Analytics Professional Certificate – Coursera [Certificate]
- Artificial Intelligence Certification – Infosys Springboard [Certificate]
- Prompt Engineering Certification – Infosys Springboard [Certificate]
- Introduction to Data Science – Infosys Springboard [Certificate]

Leadership & Activities

- **Technical Secretary – Ekasutram Mathematics Club:** Led website development and coordinated technical initiatives.
- **Event Organizer – Blood Donation Drive:** Organized and led a blood donation event during the first year of B.Tech.
